# Pendant Systems

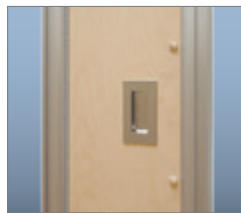

## Spectra Series

Our Spectra Series Pendant System can be easily upgraded with a Patient Lift Pendant (PLP) to assist with the transferring and repositioning of immobilized patients. The electric brake handle is mounted onto the service console and allows easy maneuvering of the pendants. With eight integrated equipment rails positioned on each console, the end user is also able to choose from a wide range of accessories to enhance their pendant system.

## Patient Lift Pendant

Safely reposition, turn and transfer your patients in and out of bed without any lifting. The patented Patient Lift Pendant (PLP) eliminates the need to install tracks in the ceiling by integrating the patient lift track into the pendant arm. This unique design frees up limited ceiling space for proper pendant placement and medical lighting. The PLP is capable of utilizing a patient lift motor rated to lift 1000 lbs (454 kg).

Holds up to 1000 lbs (454 kg)

Patient Repositioning

# ETS

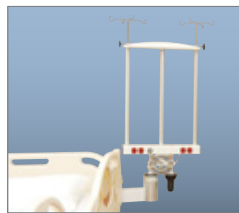

## Equipment Transport System

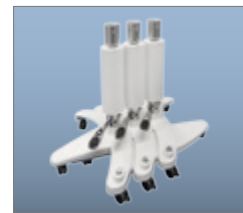

The ETS easily mounts onto pendants, roll stands and various types of beds. Its quiet operation utilizes the lifting mechanism of the bed to transfer the IV rack from the pendant console to the bed. Electrical outlets on the power bar provide you with convenient connections to IV pumps and the cord wrap prevents potential safety hazards for clinicians as well as patients. The ETS can hold up to 100 lbs (45 kg) of equipment.

## Key Features

- The ETS allows easy transport of equipment that is in operative use by a patient
- Can be effortlessly moved by one clinician from the service console in the OR to the patient bed for transportation to the ICU
- Remains sturdy when transported through the hospital, in elevators and around hallway corners
- Innovative Roll Stand Base Design allows for easy storage with nesting feature
- Instant electrical connection
- Applications: ER, Trauma, Operating Rooms and Intensive Care Units

Effortless Transport with Unique Base Design

## Saturn Series

Available in either fixed or rotating, with our dual electric/friction electric brakes – the Saturn Series Pendant is the perfect solution for many applications. The console is fully customizable with MedGas, electrical and data outlets as well as a full line of accessories and lighting. The Saturn series brings value to any room by keeping equipment, tubing and other accessories off the floor and allows for cleaning underneath the console at all times.

# Dual Electric/Friction Brakes

## Electric Brakes with Backup Safety Friction Brake

Electric Brake

Our electric brake operates by using electricity – no additional piping of gases or compressors is required to control the brakes, resulting in long term cost savings. Brake release buttons are accessible on our ergonomic, user friendly handle for efficient operation. In case of emergency or power outage, our backup friction brake ensures the pendants can always be moved, but never drift.
